## SUMMARY

Recent graduate of computer science and data science with 6 years coding experience, skills concentrated in low-level programming and comprehensive data analysis. Seeking full-time positions starting immediately.

## WORK EXPERIENCE

### IBM - Durham, NC

- **Back End Development Intern** (*May 2023 - Aug 2023*)  
Designed internal Python tools for IBM C++ developers, diagnosed test failure causes on the pipeline, and restructured cryptography-related test suites to improve scalability.

### The Boring Company - Las Vegas, NV

- **Software Engineering Intern** (*Jan 2022 - Aug 2022*)  
Lead remote development of high-level APIs for external open-source cryptocurrency project, and built multiple custom services for device health diagnostics on the Las Vegas Loop.

### Illinois Institute of Technology - Chicago, IL

- **UG Researcher - Battery Operated Radiator Control** (*Aug 2022 - Dec 2023*)  
Built firmware for automatic steam radiator control system and steam trap fault detection.
- **UG Researcher - Sustainable Blockchain Development** (*Aug 2021 - May 2022*)  
Constructed a fast and low-power solution to cryptocurrency using Proof-of-Space consensus.
- **UG Teaching Assistant - Data Structures and Algorithms** (*Aug 2021 - May 2023*)  
Prepared demos, explained concepts, and graded student work for a core computing course.

## SKILLS

C • C++ • Python • R • Golang • Java • SQL • HTML • Linux • Git • Perforce • Spreadsheet  
Familiarity with: Arduino • ROBOTC for VEX Robotics • Autodesk CAD • CloudCompare

## FEATURED PROJECTS

- **Calamos Investments: Analyzing Financial Data to Maximize Company Profits** (*2023*)  
Partnered with Chicago trading firm for master's capstone project to find patterns in firm's profitable clients, through analysis of client attributes and asset preferences over time.
- **Libdogecoin: C Library for Simplified Core Dogecoin Functionality** (*2022*)  
Assisted design of a v0.1 static C library to generate cryptographic key pairs and send valid transactions to the Dogecoin mainnet. Designed wrappers for library in Python and Golang.
- **GigiCoin: Sustainable, High-Throughput, Proof-of-Space Cryptocurrency** (*2021*)  
Built a cryptocurrency which values network-dedicated disk storage rather than proof of hashing power. Received first place in the 2021 Grainger Computing Innovation Prize.

## EDUCATION

### Illinois Institute of Technology (*Aug 2019 - Dec 2023*)

- *Master of Science in Data Science.* GPA 3.545.
- *Bachelor of Science in Computer Science. Minor in Music.* GPA 3.736.

**Relevant Coursework:** Applied Stats, Data-Intensive Computing, Data Privacy and Security, Data Prep and Analysis, Machine Learning, Monte Carlo Methods in Finance, Operating Systems, Systems Programming.

## LEADERSHIP

- **Association for Computing Machinery - Women's Chapter** (*2019-2023*)  
President of student club; previously marketing director, treasurer, and VP. Responsible for directing the board, facilitating events, communicating with staff, and training new members.
- **Illinois Institute of Technology Camras Scholars Program** (*2019-2023*)  
Selected as a member of a reputable club for scholars exhibiting high quality in character, leadership, and work ethic. Received full tuition scholarship from said organization.
